Education for Sustainable Development in Higher Education

University of Gloucestershire, UK, November 2014

Report. Available at: www.ue4sd.eu/outcomes/111-leading-practice-publication-launched-at-the-ue4sd-annual-conference-in-madrid

The report, developed as part of a three-year project entitled University Educators for Sustainable Development (UE4SD), funded by the European Commission and led by the University of Gloucestershire, captures recent efforts to support the development of education for sustainable development (ESD) competences of university educators. The project has 54 partners across 33 countries in Europe divided into four regional hubs to ensure that regional scenarios and contexts are visible throughout the project. The aim is to draw on best practices, new initiatives and usable tools for professional development in ESD for university educators.

Learning and Teaching Standards for Environment and Sustainability

University of Newcastle, Australia, 2014

Project. Available at: <http://environment.tas.gradschool.edu.au/>

An Australian multi-institutional project team has developed new national standards to support the design and delivery of innovative higher education in the Environment and Sustainability field. The standards are included in the newly published *Learning and Teaching Academic Standards Statement for Environment and Sustainability* and are endorsed by the Australian Council of Environmental Deans and Directors. The standards are grouped into four domains: transdisciplinary knowledge, systemic understanding, skills for environment and sustainability and ethical practice.
